

# Understanding Master Key Systems

The below chart is a basic example of a great-grand master key system which is not used on all buildings, but more for a larger system, such as an entire school system or government system. This is for demonstration purposes only.

Separate Key 1 (SKD1)

Separate Key 2 (SKD2)

Note: SKD keys are separate keys that the end user does not want connected to the great-grand master key system.

Key Symbol    Key Code
