

ABOUT THE PRODUCT:

Steelcraft B18, B16 and B14 Series Flush Doors are designed to meet the architectural requirements for full flush, steel stiffened doors.

The door face sheets are supported by the internal steel stiffeners, which are welded to the face sheets.

The B Series Door offers a wide range of specifiable options including sizes, glass light designs, optional edge constructions and hardware (mechanical, pneumatic, electrical) preparations.

B-Series Doors are 1-3/4" (45mm) thick.

THE USE OF HIGH GLOSS PAINT IS NOT RECOMMENDED. All internal steel stiffeners are welded to both face sheets. High gloss paint accentuates the visibility of all welds.
